Since I am a rugby player at MSU, I have decided to base my project on completing a rugby website for the club. This website will be used to sign-up future recruits to our mailing list, keep fans up to date on our games and events, and it will showcase the players and coaches for fans.

Our current website is bland and too cluttered. I will focus on cleaning up the layout of the website while also adding some javascript elements and a more modern and enticing look and feel.
